“

*Addiction is a disease of the brain
requiring a holistic treatment
approach."*

Arwen Podesta, MD

*All of our patients in detox now receive EnLyte (ENL),
once-a-day, also upon discharge and through rehab."*

Andrew Farah, MD

What is EnLyte (ENL)?

EnLyte (ENL) provides all the micronutrient coenzymes & cofactors needed for optimal monoamine synthesis, optimal antioxidant production and optimal homocysteine reduction

Clinically Proven

In one of EnLyte's important published clinical trials, participants saw a reduction in homocysteine by 30% compared to placebo *.

*Published in the Journal of Clinical Psychiatry 2016

Benefits of EnLyte (ENL):

- Normalizes and balances neurotransmitter production
- Eliminates negative effects of MTHFR SNP Genotypes
- Increases dopamine levels in reward pathway
- Provides protection for the dopaminergic system against the dopamine-depleting effects of drugs

Safe Ingredients

EnLyte contains natural ingredients that are generally recognized as safe by the FDA and are gluten-free, dairy-free, wheat-free, sugar-free, egg-free, with no artificial colorants.

Dosing

The recommended dosing is (1) softgel in the morning or as recommended by your healthcare provider.
