

Realize that most kids with ADHD, at least two-thirds, have comorbidities. They have something else in addition to ADHD."

Andrew Farah, MD

"ADHD is not a behavior problem or a discipline problem. ADHD is a medical disorder in which genetic, neurological, nutritional, and environmental factors imbalance the brain, causing imbalanced behavior."

James Greenblatt, MD

Clinically Proven

In one of EnLyte's important published clinical trials, participants with Major Depressive Disorder and MTHFR saw a 75% improvement and 42% remission compared to placebo.

Results

"People first notice improved energy, focus, concentration and sleep and most begin to feel a difference in about 2 weeks"

Andrew Farah, MD
